WordPress Developer – Assignment

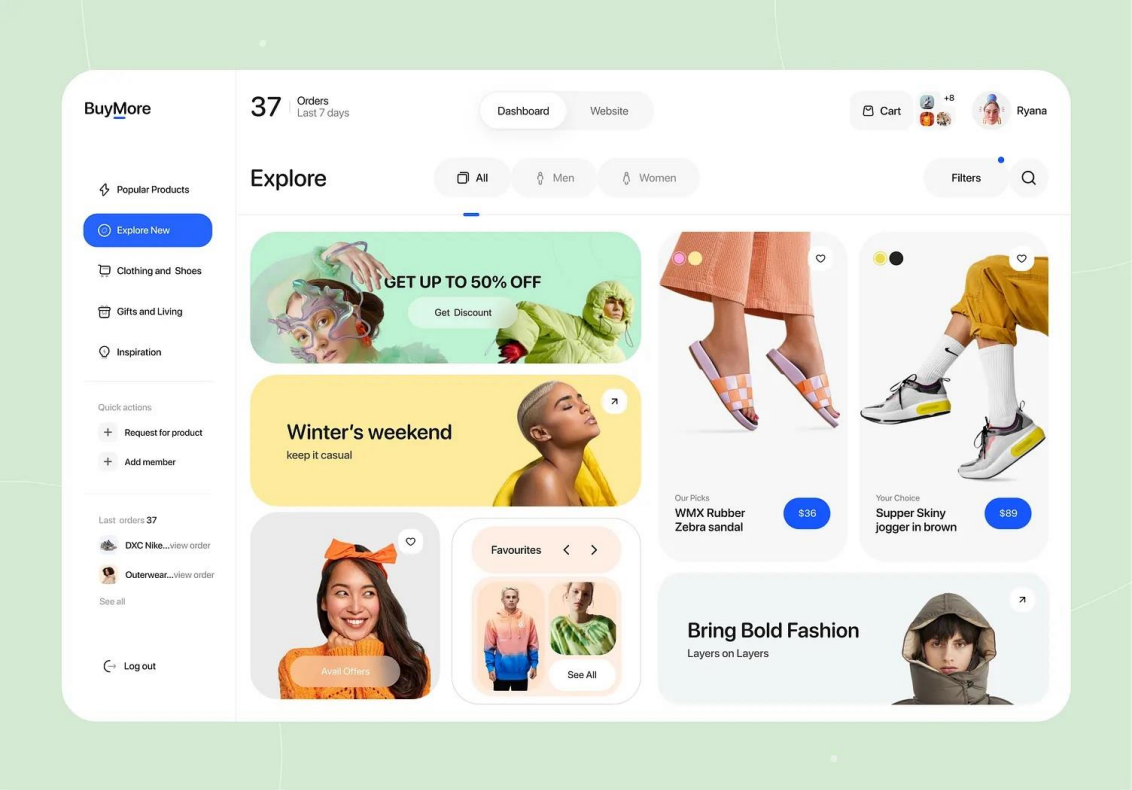

Objective

Create the webpage shown in the attached reference image using **WordPress**, while following the technical and implementation requirements below.

Requirements

- The desktop version should closely match the **attached reference image** in terms of layout, spacing, typography, and overall design.
- The webpage must be **fully responsive** across:
  - Desktop
  - Tablet
  - Mobile
- Use **custom coding** using PHP, HTML, CSS, JavaScript, and WordPress functionality as required.
- **Elementor or any other page builder must NOT be used.**
- The implementation must be developed as a **WordPress plugin**.
- The code should be:
  - Clean
  - Well-structured
  - Maintainable
  - Properly organized
- The content should be implemented in a way that demonstrates **dynamic content handling and CMS usability**.

Note: Please use the attached reference image as the design reference for the webpage.

Please use the attached reference image as the design reference for the webpage.

Expected Outcome

Please submit the following:

1. GitHub Repository

Share the **GitHub repository link** containing the complete WordPress plugin code.

2. Screen Recording

Share a short screen recording demonstrating:

- The completed webpage
- Desktop, tablet, and mobile responsiveness
- Brief explanation of the implementation
- Overview of the plugin structure and code
- How dynamic content is handled

Important: The assignment will **not be processed without the screen recording and code explanation.**

Evaluation Criteria

The assignment will be evaluated based on:

1. **Design Accuracy** – How closely the webpage matches the reference image
2. **Responsive Design** – Performance and layout across desktop, tablet, and mobile
3. **Dynamic Content Handling** – Proper use of WordPress/CMS functionality
4. **CMS Usability** – Ease of managing or updating content
5. **Code Structure & Cleanliness** – Quality, organization, and maintainability of the code
6. **Technical Explanation** – Clarity of the screen-recording explanation

Deadline

Please submit the completed assignment **within 2 days of receiving this assignment**.

Submission

GitHub Repository: _____

Screen Recording: _____

Important Note: Please ensure that both the **GitHub repository** and **screen recording** are submitted before the deadline. Submissions without the required screen recording will not be processed.
